Note:

1. Academic year to fall retention is defined as follows. Let X be the number of students enrolled at any point during a particular academic year and let Y be the number of those students who graduated. Then $X - Y$ is the number of students eligible to continue the following fall. Instead of $X - Y$, only Z students continue. The retention is the fraction $Z / (X - Y)$. The percent retention is 100 times this fraction.

2. The attrition calculation includes students transferring to other schools of NYU.
